

Consolidated Financial Statements of

**American CuMo Mining
Corporation**

December 31, 2017

UNAUDITED

NOTICE

The accompanying unaudited condensed consolidated interim financial statements of American CuMo Mining Corporation (the "Company") have been prepared by and are the responsibility of the Company's management. The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an entity's auditor.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

1. Nature of operations

American CuMo Mining Corporation (“CuMoCo”) is an exploration and development company with mineral right interests in the United States of America and Canada. CuMoCo was incorporated under the laws of British Columbia in 1971.

These consolidated financial statements include the accounts of CuMoCo and its wholly-owned subsidiaries (collectively, the “Company”): Idaho CuMo Mining Corporation (“Idaho CuMo”, formerly Mosquito Mining Corp.), MSQ Operations Inc. (inactive) and 1156207 Ontario Ltd (inactive).

The Company is in the process of exploring its mineral right interests in the United States and at the date of these consolidated interim financial statements, has not yet determined whether any of its mineral properties contain economically recoverable mineral reserves. Accordingly, the carrying amount of mineral right interests represents cumulative expenditures incurred to date and does not necessarily reflect present or future values. The recovery of these costs is dependent upon the discovery of economically recoverable mineral reserves and the ability of CuMoCo to obtain the necessary financing to complete their exploration and development and to resolve any environmental, regulatory, or other constraints. Uncertainty also exists with respect to the recoverability of the carrying value of certain mineral right interests. The ability of the Company to realize on its investment in resource properties is contingent upon resolution of the uncertainties and confirmation of the Company’s title to the mineral properties.

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assume that the Company will continue operations for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due. The Company does not generate material cash flows from operations and accordingly, CuMoCo will need to raise additional funds through future issuance of securities. Although CuMoCo has been successful in raising funds in the past, there can be no assurance CuMoCo will be able to raise sufficient funds in the future, in which case the Company may be unable to meet its obligations as they come due in the normal course of business. The Company has not determined whether any of its properties contain mineral reserves that are economically recoverable. It is not possible to predict whether financing efforts will be successful or if the Company will attain a profitable level of operations. Since inception, the Company has incurred cumulative losses of \$54,538,101 (June 30, 2017: \$53,412,786) and as at December 31, 2017 had a working capital deficiency of \$1,973,641 (June 30, 2017: working capital deficiency of \$4,604,186), which may cast significant doubt regarding CuMoCo’s ability to continue as a going concern. Should CuMoCo be unable to realize its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts on the statement of financial position.

CuMoCo’s common shares are listed on the TSX Venture Exchange (“TSX-V”) and on the OTCQX stock exchange in the United States, under the trading symbols “MLY” and “MLYCF”, respectively. CuMoCo’s share options and warrants are not listed.

The head office and principal address of the Company is 638 Millbank, Vancouver, British Columbia, Canada V5Z 4B7.

These consolidated financial statements were authorized for issue by the Board of Directors on February 28, 2018 and have been prepared in accordance with and in full compliance with the International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”).

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

2. Basis of presentation.

a) Basis of presentation

The consolidated financial statements of the Company have been prepared in accordance with IFRS and on an historical cost basis, except for financial instruments which have been measured at fair value. The consolidated financial statements are presented in Canadian dollars and all values are rounded to the nearest dollar except where otherwise indicated.

b) Adoption of new and revised standards and interpretations

Accounting policies adopted during the current year

Effective July 1, 2015, the Company has applied the following new accounting standards or amendments which were issued by the IASB:

- Amendments to IFRS 2, Share-based Payment
- Amendments to IFRS 8, Operating Segments
- Amendments to IFRS 13, Fair Value Measurement
- Amendments to IAS 16, Property, Plant and Equipment
- Amendments to IAS 24, Related Party Disclosures

The adoption of these new standards or amendments had no material impact on the Company's consolidated financial statements.

Accounting standards issued but not yet effective

Effective for annual periods beginning on or after January 1, 2018:

- IFRS 9, Financial Instruments

The Company has not early adopted this new standard to existing standards and does not expect the impact of this standard on the Company's consolidated financial statements to be material.

3. Summary of significant accounting policies

Basis of consolidation

The consolidated financial statements include the financial statements of CuMoCo and its controlled subsidiaries (Note 1). Control is achieved when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

All intercompany transactions, balances, income and expenses are eliminated on consolidation.

Significant accounting judgments and estimates

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual experience may differ from these estimates and assumptions.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

3. Summary of significant accounting policies (cont'd)

Significant accounting judgments and estimates (cont'd)

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both.

Information about critical accounting estimates and judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements are discussed below:

- Judgments

- a) Unproven mineral right interests

The application of the Company's accounting policy for unproven mineral right interests requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions may change if new information becomes available. If, after expenditures are capitalized, information becomes available suggesting that the recovery of the expenditures is unlikely, the amount capitalized is impaired with a corresponding charge to profit or loss in the period in which the new information becomes available.

- b) Title to unproven mineral right interests

Although the Company has taken steps to verify title to its unproven mineral right interests, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

- c) Going concern

Critical judgement and estimates are applied for the determination that the Company will continue as a going concern for the next year.

- Estimates

- a) Share-based payments:

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date in which they are granted. Estimating fair values for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. The estimate also requires determining the most appropriate inputs to the valuation model, including the expected life of the share option, volatility and dividend yield, and making assumptions about them. The model and assumptions used by the Company to estimate the fair value of share-based payments are disclosed in Note 13.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

3. Summary of significant accounting policies (cont'd)

Foreign currency translation

The Canadian dollar is considered to be the functional currency and the presentation currency of the Company and all of its subsidiaries, with the exception of Idaho CuMo.

The functional currency of Idaho CuMo is the United States ("US") dollar. This subsidiary has been translated into the Canadian dollar in accordance with IAS 21, *Effects of Changes in Foreign Exchange Rates ("IAS 21")*. These guidelines require that assets and liabilities be translated using the exchange rate at period end, and income and expenses items are translated using the exchange rate at the dates of the transactions. All resulting exchange differences are recognized in other comprehensive income (loss).

For CuMoCo and its subsidiaries (with the exception of Idaho CuMo) transactions denominated in currencies other than the Canadian Dollar are translated using the exchange rate in effect on the transaction date or at an average rate. At the end of each reporting period, monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange in effect at the balance sheet date. Non-monetary items are translated at historical rates. Exchange gains and losses arising from translation are recorded in the consolidated statements of operations and comprehensive loss.

Investments

Investments in which the Company exerts significant influence are accounted for using the equity method whereby the original cost of the investment is adjusted for the Company's share of earnings, losses and dividends. Investments in which the Company does not exert significant influence are accounted for using the cost method. Under the cost method of accounting, the investment is initially recorded at cost and earnings from such investments are recognized only to the extent they are received or receivable.

Property, plant and equipment

Property, plant and equipment are recorded at cost and are amortized at the following annual rates:

- Office equipment and furniture: 30% declining balance method.

Unproven mineral right interests

The Company capitalizes into intangible assets all costs, net of any recoveries, of acquiring, exploring and evaluating an unproven mineral right interest, until the rights to which they relate are placed into production, at which time these deferred costs will be amortized over the estimated useful life of the rights upon commissioning the property, or written-off if the rights are disposed of, impaired or abandoned.

Management reviews the carrying amounts of mineral rights annually or when there are indicators of impairment and will recognize impairment based upon current exploration results and upon assessment of the probability of profitable exploitation of the rights. An indication of impairment includes but is not limited to expiration of the right to explore, substantive expenditure in the specific area is neither budgeted nor planned, and if the entity has decided to discontinue exploration activity in a specific area. Management's assessment of the mineral right's fair value is also based upon a review of other mineral right transactions that have occurred in the same geographic area as that of the rights under review.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

3. Summary of significant accounting policies (cont'd)

Unproven mineral right interests (cont'd)

Costs include the cash consideration and the fair value of shares issued on the acquisition of mineral rights. Rights acquired under option or joint venture agreements, whereby payments are made at the sole discretion of the Company, are not accrued and are only recorded in the accounts when the payments are made. Proceeds from property option payments received by the Company are netted against the deferred costs of the related mineral rights, with any excess being included in operations.

There may be material uncertainties associated with the Company's title and ownership of its unproven mineral right interests. Ordinarily the Company does not own the land upon which an interest is located, and title may be subject to unregistered prior agreements or transfers or other undetected defects.

Impairment of non-financial assets

At each date of the statement of financial position, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is an indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the assets belong.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the statement of loss and comprehensive loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years.

Reclamation provision

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration, development or ongoing production of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided and capitalized at the start of each project to the carrying amount of the asset, as soon as the obligation to incur such costs arises. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either the unit-of-production or straight-line method. The related liability is adjusted for each period for the unwinding of the discount rate and for changes to the current market-based discount rate, amount or timing of the underlying cash flows needed to settle the obligation. Costs for restoration of subsequent site damage which is created on an ongoing basis during production are provided for at their net present values and charged against profits as extraction progresses.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

3. Summary of significant accounting policies (cont'd)

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) that has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risk specific to the obligation. Any increase in a provision due solely to passage of time is recognized as interest expense.

Warrants

Proceeds from issuances by the Company of units consisting of shares and warrants are allocated based on the residual method, whereby the carrying amount of the warrants is determined based on any difference between gross proceeds and the estimated fair market value of the shares. If the proceeds from the offering are less than or equal to the estimated fair market value of shares issued, a nil carrying amount is assigned to the warrants.

Share-based payments

Employees (including directors and senior executives) of the Company may receive a portion of their remuneration in the form of share-based payment transactions, whereby employees render services as consideration for equity instruments ("equity-settled transactions").

In situations where equity instruments are issued for goods or services, the share-based payment is measured at the fair value of the goods and services received. Where the consideration cannot be specifically identified, they are measured at the fair value of the share-based payment.

The costs of equity-settled transactions with employees are measured by reference to the fair value at the date on which they are granted.

The costs of equity-settled transactions are recognized, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award ("the vesting date"). The cumulative expense is recognized for equity-settled transactions at each reporting date until the vesting date reflects the Company's best estimate of the number of equity instruments that will ultimately vest.

No expense is recognized for awards that do not ultimately vest, except for awards where vesting is conditional upon a market condition, which are treated as vesting irrespective of whether or not the market condition is satisfied provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled award are modified, the minimum expense recognized is the expense as if the terms had not been modified. An additional expense is recognized for any modification which increases the total fair value of the share-based payment arrangement or is otherwise beneficial to the employee as measured at the date of modification.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

3. Summary of significant accounting policies (cont'd)

Income tax

Income tax expense represents the sum of tax currently payable and deferred tax.

- Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the date of the statement of financial position.

- Deferred income tax

Deferred income tax is provided using the liability method on temporary differences at the date of the statement of financial position between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized except:

- where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred income tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each date of the statement of financial position and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Deferred income tax assets for unused tax losses, tax credits and deductible temporary differences are reassessed at each date of the statement of financial position and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been substantively enacted at the date of the statement of financial position.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

3. Summary of significant accounting policies (cont'd)

Income tax (cont'd)

Deferred income tax relating to items recognized directly in equity or OCI is recognized in equity or OCI and not in the statement of loss and comprehensive loss.

Income (loss) per share

Basic earnings (loss) per share are computed by dividing the net earnings (loss) attributable to common shareholders by the weighted average number of shares outstanding during the reporting period. Diluted earnings (loss) per share is computed similar to basic earnings (loss) per share except that the weighted average shares outstanding are increased to include additional shares for the assumed exercise of stock options and conversion of notes, if dilutive. The number of additional shares is calculated by assuming that outstanding stock options were exercised and that the proceeds from such exercises were used to acquire common stock at the average market price during the reporting periods.

Related party transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence, related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties. Related party transactions that are in the normal course of business and have commercial substance are measured at the exchange amount, which is determined on a cost recovery basis.

Financial assets

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held to maturity, available for sale, loans and receivables or fair value through profit or loss ("FVTPL").

Financial assets classified as FVTPL are other assets and are measured at fair value with unrealized gains and losses recognized through profit or loss.

Financial assets classified as loans and receivables and held to maturity are measured at amortized cost using the effective interest method less any allowance for impairment. The effective interest method is a method of calculating the amortized cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset, or, where appropriate, a shorter period.

Financial assets classified as available for sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income (loss) except for when there is a significant or prolonged decline in the fair value of that investment below its cost, at which time the impairment is recognized in profit or loss.

Transaction costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

3. Summary of significant accounting policies (cont'd)

Financial liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other financial liabilities.

Financial liabilities classified as other financial liabilities are initially recognized at fair value less directly attributable transaction costs. After initial recognition, other financial liabilities are subsequently measured at amortized cost using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period.

Financial liabilities classified as FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Derivatives, including separated embedded derivatives, are also classified as FVTPL unless they are designated as effective hedging instruments. Transaction costs on financial liabilities classified as FVTPL are expensed as incurred.

At the end of each reporting period subsequent to initial recognition, financial liabilities at FVTPL are measured at fair value, with changes in fair value recognized directly in profit or loss in the period in which they arise.

Impairment of financial assets

The Company assesses at each date of the statement of financial position whether any indicators exist that the Company's financial assets are impaired.

Assets measured at amortized cost

If there is objective evidence that an impairment loss on assets carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset is then reduced by the amount of the impairment. The amount of the loss is recognized in profit or loss.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed to the extent that the carrying value of the asset does not exceed what the amortized cost would have been had the impairment not been recognized. Any subsequent reversal of an impairment loss is recognized in profit or loss.

In relation to trade receivables, a provision for impairment is made and an impairment loss is recognized in profit and loss when there is objective evidence (such as the probability of insolvency or significant financial difficulties of the debtor) that the Company will not be able to collect all of the amounts due under the original terms of the invoice. The carrying amount of the receivable is reduced through use of an allowance account. Impaired debts are written off against the allowance account when they are assessed as uncollectible.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

3. Summary of significant accounting policies (cont'd)

Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at banks and on hand, and highly liquid investments with an original maturity of three months or less, which are readily convertible into a known amount of cash. There were no cash equivalents at June 30, 2016 and 2015.

Borrowings

Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized as an adjustment to interest expense over the period of the borrowings using the effective interest method.

Fees paid to establish loan facilities are recognized as transaction costs of the loan and are deferred and recognized as an adjustment to the effective interest rate on the loan once drawn.

Compound financial instruments issued by the Company include convertible debentures that can be converted at a fixed conversion rate to share capital at the option of the holder. The liability component of convertible debentures is recognized initially at fair value of a similar liability that does not have an equity conversion option. The conversion component is initially valued at fair value based on generally accepted valuation techniques.

If convertible debentures are denominated in a currency that is different from the borrower's functional currency, both the liability and conversion components are carried as borrowings. Subsequent to initial recognition, the liability component of a convertible debenture is measured at amortized cost using the effective interest method. The conversion component of the convertible debenture is re-measured to fair value at each reporting period using the period end foreign exchange rate and changes in value are recognized as a component of finance costs.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability, or a portion of the liability, for at least 12 months after the reporting date.

8. Unproven mineral right interests

The Company's flagship project is the CuMo molybdenum project, located in Idaho, in the United States. The Company's Boise property, also located in Idaho, is contiguous to and provides access to the CuMo project.

The Company also has other unproven mineral right interests in the United States and in Canada, which have been optioned to other exploration companies.

CUMO PROJECT (United States)

The CuMo Project is situated in the mountains of south-central Idaho, approximately 15 miles northeast of the town of Idaho City. It consists of 161 unpatented mineral claims.

The project was optioned to the Company by CuMo Molybdenum Mining Inc. in 2004. The terms of the option agreement called for 300,000 CuMoCo shares (issued) and a combination of advance royalty payments and work requirements outlined below.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

8. Unproven mineral right interests (cont'd)

CUMO PROJECT (United States) (cont'd)

1. Advance royalty payments:

- US\$10,000 upon signing (completed);
- US\$10,000 after 60 days (completed);
- US\$5,000 after 6 months (completed);
- US\$20,000 1st year anniversary (completed);
- US\$20,000 2nd year anniversary (completed);
- US\$15,000 3rd year anniversary (completed);
- US\$15,000 every 6 months thereafter (up-to-date).

These payments are to be credited against a 1.5% net smelter return ("NSR") which reduces to 0.5% NSR after cumulative payments of US\$3,000,000.

2. Work requirements:

- US\$25,000 during the first year (completed);
- At least US\$50,000 each year thereafter (up-to-date).

Adair Property

On February 5, 2017, the Company completed an agreement to acquire from a group of local prospectors twenty (20) unpatented mining claims adjacent to the CuMo property. The consideration payable for the claims was a one-time payment of the issuance of Idaho CuMo's 7-year term silver convertible debenture valued at US\$ 250,000 (issued), one million common shares of CuMoCo (issued), and the sum of US\$ 10,625 (paid) representing an advance on the initial 6-month interest payment on the convertible debenture.

GeoResources Property

On April 21, 2017, the Company entered into an option agreement to acquire from GeoResources Inc. a total of thirty-five (35) patented mining claims, covering an area of approximately 640 acres adjacent to the CuMo Project. Patented claims contain the surface rights as well as the mineral rights.

The consideration payable for the claims is as follows:

Upon closing date of the agreement, the sum of US\$320,000 (paid) in cash, two CuMo Units in the aggregate principal amount of US\$500,000 (issued) and such number of CuMoCo common shares having a value of US\$322,500 (issued 1,151,375 common shares). The shares were issued at a price equal to the 10-day weighted average trading price of the shares on the TSX Venture Exchange as of the last business day prior to the Closing Date;

Upon the first anniversary of the Closing Date, US\$320,000 in cash, one CuMo Unit in the aggregate principal amount of US\$250,000 and such number of CuMoCo common shares having a value of US\$322,500. The shares are to be issued at a price equal to the 10-day weighted average trading price of the shares on the TSX Venture Exchange as of the last business day prior to the first anniversary of the Closing Date;

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

8. Unproven mineral right interests (cont'd)

CUMO PROJECT (United States) (cont'd)

GeoResources Property (cont'd)

Upon the second anniversary of the Closing Date, US\$320,000 in cash, one CuMo Unit in the aggregate principal amount of US\$250,000 and such number of CuMoCo shares having a value of US\$322,500. The shares are to be issued at a price equal to the 10-day weighted average trading price of the shares on the TSX Venture Exchange as of the last business day prior to the first anniversary of the Closing Date; and

Upon the third anniversary of the Closing Date, US\$320,000 in cash, one CuMo Unit in the aggregate principal amount of US\$250,000 and such number of CuMoCo shares having a value of US\$322,500. The shares are to be issued at a price equal to the 10-day weighted average trading price of the shares on the TSX Venture Exchange as of the last business day prior to the first anniversary of the Closing Date.

Payment of the Option Payments (except for the issuance of the CuMoCo shares) may be accelerated at CuMoCo's option.

The CuMo Units issued per the terms of the GeoResources agreement have the same terms as those disclosed in Note 10. The only difference is the security, with the CuMo Units issued per the GeoResources agreement being secured by the 35 patented claims making up this option agreement.

BOISE PROPERTY (United States)

On July 8, 2010, the Company entered into an option agreement, amended on July 5, 2011, to purchase certain mineral claims that included surface rights located in Boise County, Idaho. These patent mineral claims are contiguous to and provide access to the CuMo project. In order to maintain the option in good standing, the Company was required to make option payments of US\$ 1,200,000. These payments have been completed and the Company has obtained title to the Boise property, which becomes part of the overall CuMo Project.

CALIDA GOLD (United States)

On October 31, 2016, the Company entered into an option agreement to purchase certain mineral claims located in Lemhi County, Idaho. The property consists of eight unpatented mineral claims covering several significant mineralized gold, silver, and copper veins.

The option agreement gives the Company an option to earn a 100 percent interest by making a series of payments. An initial payment of \$40,000 US dollars has been made, and ongoing payments consist of the following:

- \$US40,000 on or before 90 days of the effective date (paid);
- \$US50,000 on or before six months of the effective date (paid);
- \$US50,000 on or before 12 months of the effective date;
- \$US50,000 on or before 18 months of the effective date;
- \$US50,000 on or before 24 months of the effective date;
- \$US50,000 every six months until commercial production; and
- \$US1 million at the start of commercial production.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

8. Unproven mineral right interests (cont'd)

CALIDA GOLD (United States) (cont'd)

The Calida agreement includes a variable buyout price, the Actual Exercise Price (AEP) that is based on the number of ounces of gold equivalent as defined in an independent 43-101 pre-feasibility or feasibility study. The AEP has a minimum price of \$10 million dollars for one million ounces of gold equivalent, rising at the rate of \$10 million dollars for each one million ounces of gold equivalent to a maximum price of \$50 million dollars for greater than five million ounces of gold equivalent.

Subsequent to entering into the option agreement, Poly Resources staked an additional 45 claims at this property.

OTHER PROPERTIES (United States)

Other unproven mineral right interests in the United States were the Spruce Mountain property, which have been fully impaired.

BRETT PROPERTY (Canada)

In 2003 the Company completed an agreement to acquire a 100% interest in the Brett #1 and Brett #2 mineral claims located in the Vernon Mining District of British Columbia for a consideration of 500,000 shares of the Company.

In 2004, Running Fox Resource Corp. ("Running Fox") and the Company entered into an option agreement on the Brett property whereby Running Fox earned a 50% interest in the property in 2004.

In 2011, the Company entered into a subsequent agreement with Running Fox whereby the Company sold to Running Fox the remaining 50% interest, subject to a sliding scale NSR on the property based on the price of gold as follows:

- Gold price up to \$500 per ounce: 2% NSR;
- Gold price between \$501 and \$1,000 per ounce: 3% NSR;
- Gold price between \$1001 and \$1,500 per ounce: 5% NSR;
- Gold price between \$1501 and \$2,000 per ounce: 6% NSR;
- Gold price over \$2,001 per ounce: 8% NSR.

On December 20, 2013, the Company entered an agreement (the "Agreement") whereby Ximen Mining Corp. ("Ximen") may acquire the Company's above NSR interest.

The consideration payable to the Company consists of up to \$1,350,000 cash and 100,000 common shares of Ximen payable prior to the third anniversary of the Agreement. In addition, there are additional share issuances of \$120,000 payable in shares due by the third year of the Agreement. The number of shares to be issued shall be calculated based on the deemed price per share being the volume-weighted average closing price (subject to TSX-V minimum pricing) of Ximen's common shares on the TSX-V for the ten trading days prior to the date the payment is due. The securities to be received pursuant to the Agreement will be subject to a four-month hold period from the date of issuance in accordance with applicable Canadian securities law.

On February 14, 2017, the Company and Ximen entered into an amended agreement to extend the delivery of the final original \$1,350,000 cash payment to February 20, 2020. The terms of the amended agreement are as follows:

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

9. Convertible notes

In order to finance the ongoing development of the CuMo Project the Company has borrowed from International Energy & Mineral Resources Investment (Hong Kong) Company Limited ("IEMR HK") the principal amount of \$1,500,000 and US\$1,500,000 and issued secured convertible notes (the "Notes") in respect of such indebtedness to IEMR HK (the "Financing").

The Notes have face values of \$1,500,000 and US\$1,500,000, respectively, and mature in October 2017 (the "Maturity Date"). The Notes accrue interest at a rate of 6.5% per annum, calculated and paid annually. At the option of IEMR HK the Notes shall be convertible at any time prior to the Maturity Date, in whole or in part, into common shares of the Company at a price of \$0.28 per common share, provided that IEMR HK shall only be permitted to exercise such conversion right to the extent that it results in IEMR HK holding no greater than 19.9% of the issued and outstanding common shares of CuMoCo.

The Canadian dollar Note was being treated as a compound financial instrument with a debt element treated as a liability and an equity conversion element treated as equity. On issuance the equity conversion feature was valued at \$297,394. Share issue costs of \$3,247 were allocated to the equity conversion feature, resulting on a net equity conversion feature of \$294,147.

The U.S. dollar Note, given it is not denominated in the functional currency of CuMoCo, is accounted for as a financial liability with an embedded derivative and host debt contract.

The Notes became due and callable on their respective due dates of October 25, 2017 and November 25, 2017 respectively. As of December 31, 2017, the notes have not been called for payment are now treated as a straight loan paying 6.5% annual interest, until such time as they are called for payment. The company will then have a minimum of 30 days to repay the loans with associated interest.

On October 30, 2017, the Company and representatives announced amending terms to the agreement. The amended terms of repayment proposed by IEMR HK include the following: (a) the immediate payment of Cdn\$597,500 (representing payment of Cdn\$545,410 of principal owing under the First Debenture and Cdn\$52,090 of accrued interest) (the "Initial Payment"); (b) payment of US\$597,500 (representing payment of US\$537,130 of principal owing under the Second Debenture and US\$60,370 of accrued interest) by November 25, 2017; and (c) payment of the remaining Cdn\$954,590 of principal owing under the First Debenture plus additional interest payable, and of the remaining US\$962,870 of principal owing under the Second Debenture plus additional interest payable, on or before December 15, 2017. The Company has wired the Initial Payment of Cdn\$597,500 and payment of US\$597,500 to IEMR HK and intends to make the other required payments as additional financing efforts are completed. IEMR HK has also requested a damages compensation payment for the amendment of the terms of repayment of up to US\$300,000.

It should be noted that the Company's legal counsel has advised that the damage compensation, if paid, would be a violation of the criminal code of Canada specifically Section 347. As of December 31, 2017, the Company continues to negotiate with IEMR(HK) on this and other matters.

The carrying values of the Notes contain the following components:

American CuMo Mining Corporation

	December 31, 2017	June 30, 2017
	\$	\$
Issue of notes	2,997,996	2,997,996
Note issue costs	(21,575)	(21,575)
Allocation of equity conversion feature		(297,394)
Accreted interest	1,500,189	2,063,602
Coupon payments	(2,132,173)	(824,837)
Change in option conversion feature		79,510
Foreign exchange loss	(69,963)	256,070

The Notes will default if the Company, or any of its subsidiaries, makes a general assignment for the benefit of its creditor, or files a proposal under the *Bankruptcy and Insolvency Act* (Canada), or shall become insolvent, or shall be declared or adjudged bankrupt, or a receiving order is made against the Company or any subsidiary unless same is being contested in good faith and is dismissed, stayed or withdrawn within 30 days.

These notes are secured by all of the assets of the parent company only, CuMoCo.

IEMR HK is a "Related Party" of the Company pursuant to the policies of the TSX-V, as IEMR HK holds approximately 12.15% of the issued and outstanding common shares of CuMoCo. As such, the financing constituted a "Related Party Transaction" under the policies of the TSX-V. The Company has relied on exemptions from the formal valuation and minority approval requirements which are available to the Company.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

10. Promissory Notes

Idaho CuMo has entered into two different promissory note agreements with two separate third-party lenders as follows:

- a) The first promissory note was entered into on March 8, 2015. This note is comprised of the sale of two Idaho CuMo Units ("CuMo Unit") for total proceeds of US\$500,000. Each CuMo Unit costs US\$250,000, consists of a promissory note which accrues annual interest at 8.5%, matures 7 years from the date of issuance and includes an option to enter into a Silver Purchase Agreement Right with the Company. Upon notice that the triggering event has occurred (the decision by the Company to go into production), the CuMo Unit holder has 30 days to enter into the Silver Purchase Agreement Right. The Silver Purchase Agreement Right allows the holder to purchase up to 375,000 ounces of refined silver from the Company at price of US\$5.00/ounce, plus make an upfront payment of US\$250,000.00. The Silver Purchase Agreement Right expires if:
- it is not entered into within 30 days of the triggering event; or
 - if the principle amount of the loan is prepaid in whole or in part prior to maturity (this prepayment requires the consent of the lender); or
 - the maturity date is reached.

This note is secured by all of the assets of the subsidiary, Idaho CuMo, except for the six claims which make up the Boise Property.

- b) The second promissory note is comprised of an initial loan in the amount of US\$250,000 which was received during fiscal 2015, and a second loan in the amount of US\$250,000 which was received during fiscal 2016, for total proceeds of US\$500,000. This loan accrues annual interest at 8.5% and was amended on January 29, 2016 to extend the maturity date to December 31, 2025. This loan also includes an option to enter into a Silver Purchase Agreement Right (same terms as noted above in a)) with the Company.

This note is secured by the six patented claims which make up the Boise Property owned by Idaho CuMo.

This loan also includes an option to acquire up to an additional ten CuMo Units if the lender makes the following payments:

- US\$500,000 (two CuMo Units) on or before December 31, 2016 (received); and
- An additional US\$500,000 (two CuMo Units) on or before December 31, 2017 (expired).

If the lender completes the above payments totalling US\$1,000,000, they will be guaranteed the option to purchase six additional CuMo Units at the date of the triggering event, for a total additional cost of US\$1,500,000. Any accrued interest would be applied against the purchase of these units.

10. Promissory Notes (cont'd)

During the year ended June 30, 2017, the Company issued a US\$250,000 promissory note per the Adair Property agreement. The Company also issued an additional two promissory notes, with an aggregate total of \$US500,000, per the GeoResources option agreement. (see Note 8)

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

As at December 21, 2017, the Company has total promissory notes issued and outstanding in the amount of US\$2,250,000. (2016: US\$1,000,000).

The Company has accrued interest of \$310,273 as of December 31, 2017 (2016: \$94,659) in respect of these promissory notes.

11. Reclamation bonds and provisions

The Company's reclamation bonds relate to the following Company properties:

	December 31 2017	June 30 2017
	\$	\$
CuMo **	-	-
Pine Tree	47,764	47,764
Cariboo	3,500	3,500
General reclamation costs	3,249	3,249
	54,513	47,764

These bonds are expected to be refunded to the Company once the government agencies are satisfied that the Company has performed all necessary reclamation activities.

** During fiscal year 2016 the CuMo project cash bond was refunded to the Company and replaced with a surety from a third party. In exchange for the third party agreeing to guarantee to fund the required Bureau of Land Management reclamation bond - currently US\$278,000, the Company was required to pay a security deposit of US\$100,000 and make ongoing annual payments of US\$8,340.

The surety deposit is refundable when the Company completes the required reclamation clean-up costs.

The Company's estimated reclamation provisions relate to the following Company properties:

	December 31 2017	June 30 2017
	\$	\$
CuMo	130,090	130,090
Pine Tree	47,764	47,764
Cariboo	-	-
General reclamation costs	-	-
	177,854	177,854

Although the Company does not anticipate being required to perform significant reclamation activities, to be conservative, it has recorded provisions for estimated reclamation costs based on the assumption that the amounts of the reclamation bonds posted with government authorities and the amount of the non-current deposit (surety deposit), approximate the best estimate of the net present value of expected future reclamation costs that may need to be incurred by the Company.

The estimated reclamation provision is comprised of deposits to the Bureau of Land Management, the United States Forest Service, the third-party provider of the surety, and other agencies for the above properties.

The continuity of the reclamation provision is as follows:

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

	December 31, 2017	June 30, 2017
	\$	\$
Balance at the beginning of the year	177,854	177,854
Foreign exchange effect on US Bonds	(4,320)	
Change in reclamation provision estimate		
Balance at the end of the year	173,534	177,854

12. Related party transactions

Details of the transactions between the Company and other related parties are disclosed below.

(a) Trading transactions

The Company's related parties consist of companies owned by or associated with executive officers and directors, and former executive officers and directors as follows:

	<u>Nature of transactions</u>
Geologic Systems Inc.	Exploration and administration fees
Trevor Burns	Management fees

During the six months ended December 31, 2017 and 2016, the Company incurred the following fees in the normal course of operations in connection with companies owned by key management and directors. Fees have been measured at the exchange amount which is determined on a cost recovery basis.

	Six months ended December 31	
	2017	2016
	\$	\$
Salaries and management fees	52,917	48,000
Exploration fees	53,325	12,000
Administration fees	58,250	30,000
	164,492	90,000

Amounts due to related parties are unsecured, non-interest bearing and due on demand. Trade and other payables at December 31, 2017 included \$617 (June 30, 2017: \$6,456), which were due to officers, director and private companies controlled by directors and officers of the Company.

Amounts payable by related parties are unsecured, non-interest bearing and payable on demand.

(b) Compensation of key management personnel

The remuneration of directors and other members of key management personnel during the six months ended December 31, 2017 and 2016 were as follows:

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

	Note	Six Months ended December 31	
		2017	2016
		\$	\$
Salaries and fees	(i)	110,447	90,000
Share-based payments	(ii)		
		110,447	90,000

(i) Salaries and fees include salaries and management fees disclosed in Note 12(a).

(ii) Share-based payments are the fair-value of options granted to key management personnel.

13. Capital and equity reserve

(a) Capital

At December 31, 2017, the Company's authorized share capital consisted of an unlimited number of common shares without par value.

Fiscal 2017

On February 28, 2017, the Company issued 1,000,000 common shares per the Adair Property agreement (see Note 8).

On June 5, 2017, the Company issued 1,151,375 common shares per the GeoResources Property agreement (see Note 8).

During 2017, the Company issued 12,127,750 common shares per the exercise of warrants. The warrants were exercisable at \$0.10 or \$0.15 per share and resulted in gross proceeds of \$1,580,999.

The Company also issued 1,475,000 common shares per the exercise of stock options. The options were exercisable at \$0.15 per share, resulting in gross proceeds of \$221,250. An additional amount of \$100,335 was transferred from equity reserve to share capital on the exercise of these options.

1,150,000 common shares were issued, pursuant to the exercise of 1,150,000 warrants. The warrants were exercisable at \$0.10 per share, for gross proceeds of \$115,000.

December 8, 2017: American CuMo received \$1,471,927 from the closing of a private placement and issued 19,625,699 shares (18,740,115 shares and 885,584 finders shares with no warrants) and 18,740,115 two year warrants exercisable at 0.125.

December 20, 2017: American CuMo received \$295,742 from rights offering and issued 4,453,776 shares.

As of December 31, 2017, the Company had 152,300,045 shares outstanding.

(b) Equity reserve

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

Share Options

Equity reserve consists of the accumulated fair value of common share options and share purchase warrants recognized as share-based payments.

The Company has an incentive share option plan under which directors, officers, consultants, and employees of the Company are eligible to receive stock options. The maximum number of shares reserved for issuance upon exercise of all options granted under the plan is equal to 10% of the then issued and outstanding common shares. No more than 5% of the issued shares may be issued to any eligible person other than a consultant in any 12-month period unless disinterested shareholder approval has been obtained. No more than 2% of the issued shares may be issued to any one consultant in any 12-month period. No more than 2% of the issued shares may be issued to all employees in the aggregate conducting investor relations activities in any 12-month period.

The exercise price of share options is determined by the Board of Directors at the time of grant and may not be less than the discounted market price as calculated and defined in accordance with the policies of the TSX-V. Options granted must be exercised no later than 10 years commencing from the later of the date of grant or such lesser period as determined by the Board. Options shall terminate automatically or 90 days after optionees no longer act as officers, directors or consultants of the Company. In the case of death, options shall terminate within one year from the event.

Once approved, all options are considered vested and are exercisable at any time, except where other vesting periods are determined by the Board.

No Share options were awarded during the six months ended December 31, 2016 and the year ended June 30, 2016 as follows:

	Six months ended December 31, 2017		Year ended June 30, 2017	
	Number of options	Weighted average exercise price \$	Number of options	Weighted average exercise price \$
Balance, beginning of year	10,375,000	0.16	9,400,000	16.00
Options granted			2,450,000	0.30
Options expired	(1,500,000)	0.30	-	-
Options exercised	(100,000)	0.15	(1,475,000)	0.15
Balance, end of year	8,775,000	0.16	10,375,000	0.16

Share Options (cont'd)

The following table summarizes information about stock options outstanding and exercisable at December 31, 2017:

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

Options Outstanding				Options exercisable		
		wt. avg.	wt. avg.	Options	wt. avg.	wt. avg.
		exercise	remaining	outstanding	exercise	remaining
exercise	Options	price	contractual	and	price	contractual
price	outstanding	\$	life(years)	exercisable	\$	life(years)
0.15	5,825,000	0.15	2.04	5,825,000	0.15	2.04
0.30	2,350,000	0.30	4.27	2,350,000	0.30	4.27
0.35	600,000	0.35	1.67	600,000	0.35	1.67
	8,775,000	0.20	2.70	8,775,000	0.20	2.70

The fair value of the share options awarded to employees and directors was estimated using the Black-Scholes option pricing model with the following assumptions for the periods presented below:

	Six months ended December 31, 2017	Year ended June 30, 2017
Risk free interest rate	0.53%	1.15%
Expected life	5 years	5 years
Expected volatility	106.70%	105.52%
Expected dividend per share	\$Nil	\$Nil

13. Capital and equity reserve (cont'd)

(b) Equity reserve (cont'd)

Share Options (cont'd)

The total share-based payment expense calculated for the six months ended December 31, 2017 was \$nil (2016: \$nil).

Warrants

At December 31, 2017, the Company had 31,310,115 warrants outstanding as a result of the private placements.

The Company has 8,716,500 warrants outstanding with an exercise price of \$0.15 per share. 3,612,500 of these warrants expire on November 13, 2020, and the remaining 5,104,000 warrants expire on June 10, 2021.

The Company has 18,740,115 warrants outstanding with an exercise price of \$0.125 per share. These warrants expire on December 5, 2019.

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

	Number of warrants	Weighted average exercise price \$	Number of warrants	Weighted average exercise price \$
Balance, beginning of year	13,832,500	0.13	25,960,250	0.13
Warrants granted	18,740,115	0.13		
Warrants exercised	(2,106,500)	0.10	(12,127,750)	0
Warrants expired	(3,247,500)	0	-	-
Balance, end of year	27,218,615	0.13	13,832,500	0.13

The warrants outstanding as at December 31, 2017 have a weighted-average remaining life of 2.48 years (2016: 1.25 years).

14. Segmented information

The Company operates in two geographical areas, being Canada and the United States. The following is an analysis of the Company's assets by geographical area and reconciled to the Company's consolidated financial statements:

Assets by geographic segment, at cost

Canada		
Current assets	2,333,635	694,929
Reclamation bonds	50,075	54,395
Non-current deposits	129,770	129,770
Property, plant and equipment	2,395	2,324
Unproven mineral right interests	20,011,376	20,002,841
	22,527,251	20,884,259
United States		
Current assets	138,419	856,277
Unproven mineral right interests	4,957,393	3,549,019
	5,095,812	4,405,296
	27,623,063	25,289,555

15. Commitments

- a) The Company has entered a lease agreement for the lease of office premises in Vancouver. The commencement date of the lease was December 1, 2016, for a two-year term. The Company's basic rent commitments for the remaining term of the contract are approximately \$44,000.
- b) During 2016 the Company entered a surety agreement that guarantees the reclamation bond on the CuMo Property (Note 11). To maintain the good standing of this surety, the Company is required to make an annual payment of US\$8,340.

16. Contingencies

American CuMo Mining Corporation

Notes to the Consolidated Financial Statements

December 31, 2017

(Expressed in Canadian dollars)

- a) In the year ended June 30, 2013, the Company received an invoice for \$77,705 from Multi-Power Products Ltd., a supplier of drill supplies, and disputed this invoice. The drill supplies were shipped directly by the supplier to a Mexican company owned by a former director and officer of the Company. During the year ended June 30, 2014, Kirkness Diamond Drilling (a former subsidiary of the Company) and the Company were served with a Notice of Civil Claim by the supplier.
- b) On April 1, 2016, the Company was notified of an action by a former officer of the Company regarding unpaid fees. This action has been inactive since April 21, 2016. The Company believes this claim is without merit.

17. Supplemental cash flow information

The following significant non-cash transactions have been excluded from the statements of cash flows:

Six months ended December 31, 2017 – No significant transactions.

18. Subsequent events

Subsequent to December 31, 2017, the following events occurred:

- a) January 8, 2017, Ximen Mining completed a consolidation of its common shares on the basis of five pre-consolidation shares for one post-consolidation share. The Company holds shares in Ximen because of a deal between Ximen and the Company to purchase the Brett royalty owned by the Company (see note 8)
- b) February 27, 2018, the Company closed its convertible debenture offering announced November 29, 2017. The Company received subscriptions totaling \$2,768,500. Certain terms of the Debentures were amended to comply with TSXV Policies. The Debentures have an initial one-year term automatically renewable annually for additional one-year terms, up to a maximum term of five years, are secured by the assets of the Company's subsidiary, Idaho CuMo Mining, and pay interest at a rate of 8.75% interest per annum, with interest paid in quarterly instalments. The Debentures are convertible into units of the Company (the "Units") at a conversion price of C\$0.075 per Unit at any time following four months and one day from the closing date until the first anniversary on the closing date, and thereafter up to the maturity date (as such date may be extended) at C\$0.10 per Unit. Each Unit will consist of one common share of the Company and one common share purchase warrant (a "Warrant"), with each Warrant entitling the holder to purchase an additional common share of the Company (a "Warrant Share") at a price of C\$0.1125 per Warrant Share for a period of five years from the closing date. Any accrued but unpaid interest under the Debentures may also be converted, at the option of the holder, into Units at the Market Price determined at the time the interest becomes payable and is subject to TSXV approval. Should the holder decide not to renew the Debentures, the Company has ninety days to repay the principal owed.
- c) February 28, 2018, the Company announced that regarding the IEMR HK debentures, IEMR HK's legal team has terminated negotiations and has submitted a claim for judgment against the Company in the British Columbia Supreme Court for CAD\$1 million and US\$1 million plus interest and court costs. The Company is in the process of preparing a response, third party notice and counterclaim against IEMR HK and certain other related entities that has the potential to more than offset the claims of IEMR HK. In the event this litigation is decided wholly or partially in IEMR HK's favour, a monetary judgment against CuMoCo would issue and CuMoCo could then simply pay the claim.
